

Letter of Recommendation

To whom it may concern,

My name is Pargol Poshtareh, and I am writing this letter of recommendation for Jessica Maximo de Souza, one of my most remarkable students in the Mobile Application Programming course at Cégep de La Gaspésie et des Îles – Campus Montreal. Jessica's journey in my class was nothing short of inspiring, and I am thrilled to share her story with you.

When Jessica first joined my class, she faced significant challenges. Like many students new to programming, she struggled with the complexity of the material and the fast-paced nature of the course. However, what truly set Jessica apart was her unwavering determination to improve. She approached every obstacle with a growth mindset, dedicating countless hours to studying, practicing, and seeking feedback. Her discipline and commitment to learning were evident, and over time, she not only caught up but became one of the top students in the class.

Jessica's transformation was remarkable. She mastered key technologies such as React, Android, and Swift, and her projects consistently stood out for their creativity and technical excellence. One of her most impressive works was the Easy Filter App, a photo-filter application that allows users to take pictures directly within the app, apply creative filters, and seamlessly store images using Firebase cloud storage.

Jessica's academic journey is a testament to her resilience and hard work. With an R score of 29.128, she has proven that she is capable of achieving excellence through discipline and perseverance. This score reflects not only her academic abilities but also her ability to overcome challenges and continuously improve. Jessica is an exceptional team player. She brings a positive attitude, a collaborative spirit, and a sense of resilience to every project.

I am confident that Jessica will bring the same level of dedication, creativity, and professionalism to any role she takes on. She is not only skilled and driven but also a thoughtful and inspiring individual who elevates those around her. Without hesitation, I recommend Jessica Maximo de Souza for any position in mobile application development.

Sincerely,

Pargol Postareh
Mobile Application Programming Instructor
Cégep de La Gaspésie et des Îles - Campus Montreal
Bachelor of Software Eng, Concordia University
Master of Software Eng Concordia University
